Music Together®

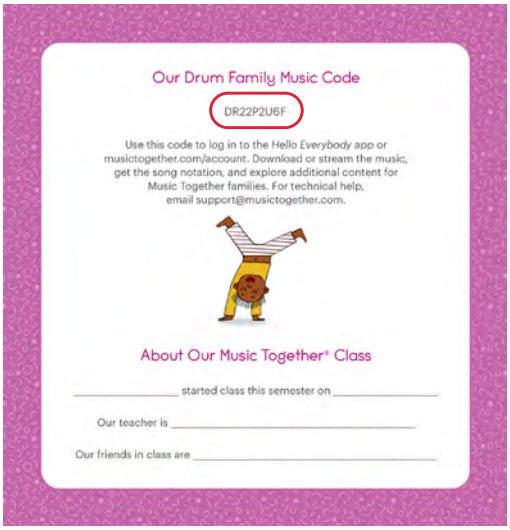

Playing Your Music Together® Songs at Home

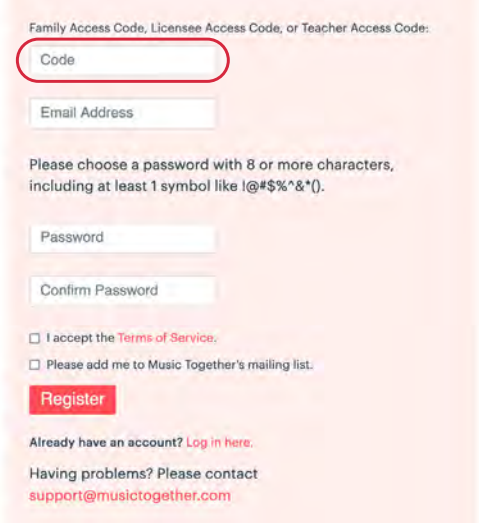

Each semester, your family will receive a new collection of songs to sing, dance, and jam along to. You can access the digital version of your songs in two ways, using the Family Access Code on the inside cover of your songbook or download card.

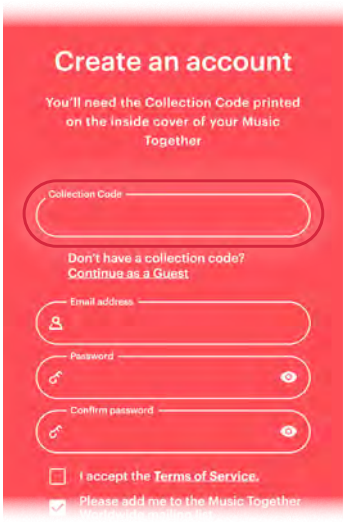

1. Download mp3s or stream songs from the **Family Music Zone®**, musictogether.com/familymusiczone
2. Play songs through the **Music Together® app**, available for Apple and Android devices

Create a MusicTogether.com Account

First, you'll create a Music Together account, either through the Music Together app or at musictogether.com/account. The process is the same: you'll enter the code that's printed on the inside cover of your songbook or download card, along with your email address and a password of your choice.

Note: This account is separate from any that you use to register for class/makeups at your local center. There is no financial or personal information stored in your MusicTogether.com account.

Share the Music with All Your Child's Caregivers

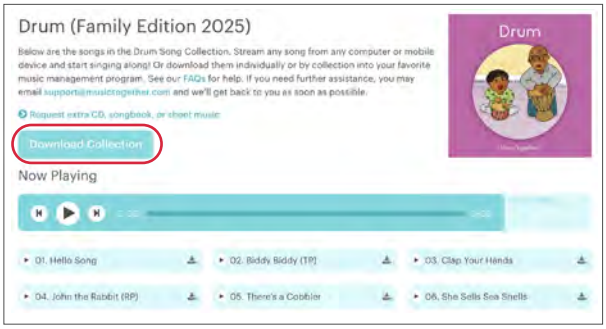

You can use the same account credentials to log in to both the Family Music Zone® and the Music Together® app, with no limit on the number of devices. So, feel free to share your account login with extended family and/or caregivers, so everyone can share in the musical fun.

Playing Music on iTunes®/Apple Devices

To play your Music Together songs through iTunes® and add them to your own playlists, etc., you will need to download the mp3s to your computer from the Family Music Zone®, and import them to iTunes. They'll then be added to your music Library on your Apple devices. Go to Apple Support for step-by-step instructions: https://support.apple.com/guide/itunes/import-items-already-on-your-computer-itns3081/windows.

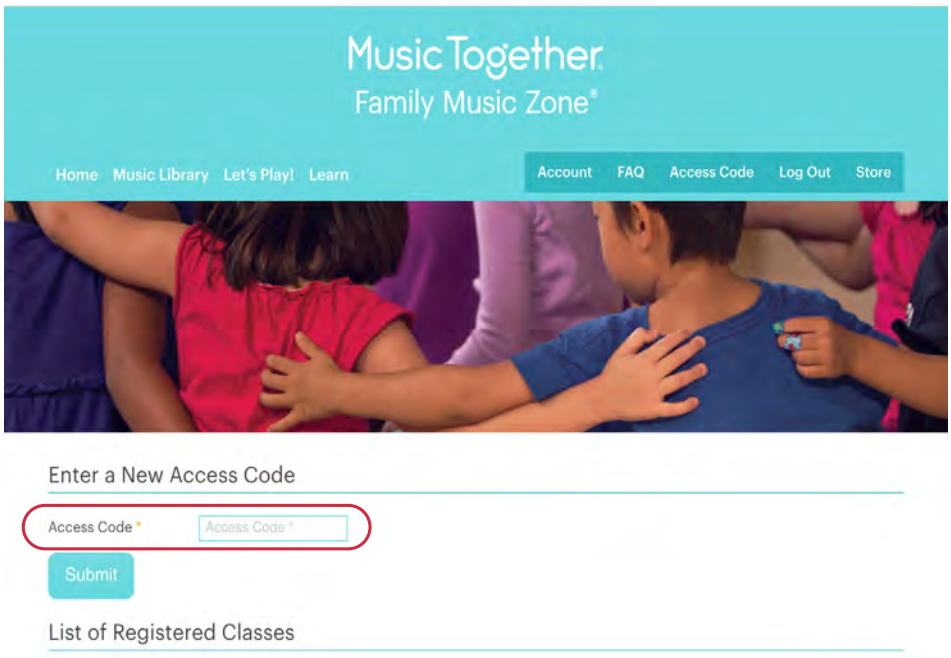

Playing Music on a Smart Speaker, Music App, or Children's Music Player

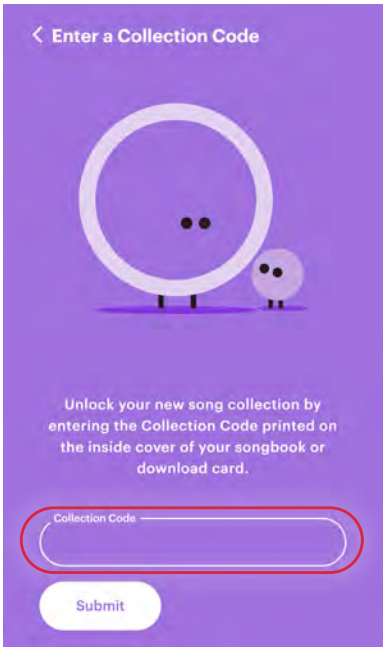

Visit the Family Music Zone to download mp3s to sync up with your favorite music apps (e.g., Spotify®), smart speakers (e.g., Alexa), or your child's music player (e.g., Tonies®). Follow the manufacturer's instructions on adding mp3s to the particular device. Here are some helpful links.

- iTunes®
- Apple Music® through Alexa
- Amazon smart speakers
- Google Nest® speakers
- Yoto Player
- Tonies®

Unlocking New Song Collections

In future semesters, you'll add your new music simply by logging in to either the Family Music Zone or the Music Together app and entering your new Family Access Code. After the code is entered, your new song collection will be added and available from any device where you're logged in.

Questions? Check out the videos and instructions at musictogether.com/account, or feel free to email support@musictogether.com.
